EXPERIENCE

Associate Product Manager

Mountain View, CA

Madhive

July 2024 – Present

- Led a complete revamp of the reporting architecture, **enhancing scalability and reducing future developer effort by 13x**, which required strong alignment with cross-functional stakeholders (sales, client success, operations, engineering, product) to drive consensus on key trade-offs and product direction
- Drove the launch of a new omnichannel adtech product, Digital Out-of-Home, across 6 teams, covering the full product cycle from campaign insertion order to reporting, contributing to **\$19M+ in revenue and growing**
- Managing two high-performing teams, owning both the data pipelines/ETLs and frontend components of our enterprise analytics dashboards, ensuring a well-prioritized, revenue-driven sprint backlog that accelerates product delivery
- Owning end-to-end product documentation (PRDs, one-pagers, technical specs, and data flow diagrams), ensuring seamless communication between business and engineering teams to deliver strong end-to-end enterprise solutions on time

Co-Founder

Cupertino, CA

Kalendir | kalendir.com

December 2024 – Present

- Shipped a fully functional MVP (desktop web application, iOS, and Android mobile apps) within 3 months. By month 4, customers were **fully relying on the platform** to manage clients, appointments, and day-to-day business operations
- Building and reiterating a SaaS appointment scheduling tool using Django & React, enabling businesses across **15+ industries and hundreds of users** to create customizable booking flows and effectively manage employees
- Planning product roadmap and ensuring strong market fit based on competitor research and direct client engagement, including door-to-door sales, client conversations, and demos
- Designing database models with a small team, contributing heavily to frontend development to enhance UI/UX, and leveraging AI tools such as **Figma Make, Claude Code, and Cursor** to streamline design and implementation
- Developed interactive dashboards in Grafana using PostgreSQL, tracking outreach, customer retention, and revenue growth, providing actionable insights to drive business strategy

Co-Founder

Cupertino, CA

ReferralHub | referralhub.dev

December 2023 – June 2024

- Co-founded and scaled an online platform from 0 to 1, achieving **200% average weekly user growth** and generating thousands in sales within the first month (featured by Bloomberg!)
- Developed customer-facing features using **React, Typescript, and Python**, including in-chat payments, user onboarding, and general marketplace features
- Managed Agile sprints, **go-to-market strategy**, and created internal Grafana dashboards using PostgreSQL to present product roadmap recommendations, all of which **3x the product's user acquisition rate**
- Utilized **Canva and Figma** to create **wireframes** and user interaction **mockups** for **critical features** (payment processing through messages, listing publication process, overall UX/UI)

Social Media Project Management Intern

Eugene, OR

NBC Sports

November 2021 – July 2022

- Collaborated with NBC Sports and Olympics executives and NIL influencers to implement strategies to increase Track and Field engagement with the younger generation by developing proposals and executing visions
- Led graphic design, video editing efforts, and app development for the Prefontaine Classic and World Championships while collaborating with social media and production teams, resulting in **900K+ engagements** across Instagram Reels and TikTok

EDUCATION

University of Oregon

September 2021 – March 2024

Bachelor of Arts in Business Administration, Concentration in Operations & Business Analytics

GPA: 4.05
